

Ebola virus epidemic in West Africa

The World Health Organization (WHO) and respective governments have reported a total of 24,282 suspected cases and 9,976 deaths, though the WHO believes that this substantially understates the magnitude of the outbreak. In the United States there has been 4 reported cases and 1 deaths.

Table 1: Casualties			
Country	Cases	Deaths	Last update (10 March 2015)
Liberia	9,343	4,162	5 March 2015[4]
Sierra Leone	11,619	3,629	8 March 2015[4]
Guinea	3,285	2,175	8 March 2015[4]
Nigeria	20	8	outbreak ended 19 October 2014[5][6]
Mali	8	6	outbreak ended 18 January 2015[7]
United States	4	1	outbreak ended 21 December 2014[8]
United Kingdom	1	0	outbreak ended 14 February 2015[9]
Senegal	1	0	outbreak ended 17 October 2014[5]
Spain	1	0	outbreak ended 2 December 2014[10]
Total	24,282	9,976	as of 8 March 2015[update]
